D1S1656	3.16	15		14	15
D2S1338	1.79	16	22	18	22
Amelogenin		X		X	Y
Interpretation: RN: 9781735 Combined Paternity Index: 5,454,355 Probability of Paternity: 99.99998% <p>The alleged father is not excluded as the biological father of the tested child. Based on testing results obtained from analyses of the DNA loci listed, the probability of paternity is 99.99998%. This probability of paternity is calculated by comparing to an untested, unrelated, random individual of the Black population (assumes prior probability equals 0.50).</p>					

Report Date: 19/12/2019

Note: Since the samples were not collected under a strict chain of custody by a third neutral party, and the Laboratory cannot verify the origin of the samples, this test result may not be defensible in a court of law for the establishment of paternity and other legally related issues. The tested parties expressly understand that the result from this test is only for personal knowledge and curiosity.
